PROFESSIONAL SUMMARY

Full Stack / Backend Developer with experience in building scalable API-driven systems and integrating third-party platforms into high-traffic commerce ecosystems. Currently working at Paytm E-Commerce on ONDC integrations, upstream provider systems, and production-grade API enhancements.

TECHNICAL SKILLS

Languages: Ruby, Python, JavaScript
Frameworks: Ruby on Rails, Django
Databases: PostgreSQL, MySQL, SQLite
API & Integration: REST APIs, Webhooks, OAuth, Token Authentication
Background Processing: Sidekiq
Libraries: Faraday, ActiveRecord
Tools: Git, Docker, Bitbucket, Postman,Docker

WORK EXPERIENCE

Associate Software Engineer
Paytm E-Commerce Pvt. Ltd – Bangalore **Feb 2024 – Present**

- Enhanced upstream API systems to enable seamless seller onboarding on the ONDC network via PAI platform.
- Integrated multiple sellers including Petpooja, A2B, Sapaad, Bitsila, and Urban Piper into production workflows.
- Improved API validation mechanisms, reducing catalog rejection rates.
- Debugged and optimized backend services to improve stability and response handling.
- Collaborated with cross-functional teams to ensure compliance with ONDC protocol standards.

Software Engineer L1
Innobits Solutions Pvt. Ltd – Bangalore **Oct 2023 – Jan 2024**

- Designed and automated third-party API integrations for upstream providers.
- Re-architected provider validation logic to improve security and reduce integration failures.
- Implemented background job processing using Sidekiq for asynchronous API calls.
- Delivered production-ready integrations within tight deadlines.

Ruby on Rails Intern **Jul 2023 – Oct 2023**

- Assisted in development of multi-provider API integrations (Petpooja, Amazon, Shopify, Urban Piper).
- Debugged and resolved API sync issues in staging and production environments.

PROJECTS

- **ROAM – Travel Together (Django/DRF/Channels) | GitHub: [link] | Demo: [link]**
- Built a social trip-planning platform to create/discover/join trips, collaborate on itineraries, split expenses, and chat in real time.
- Implemented JWT auth and a custom user model with shareable public_id (UUID) to avoid exposing sequential IDs.
- Delivered real-time trip chat using Django Channels + WebSockets with membership-based access control.
- Implemented expense split + settlement tracking (rounding-safe equal splits, validation, balances) and published Swagger/OpenAPI docs; added pytest + CI checks.
- **RIYE – Construction Management System (Ruby on Rails 8, SQLite) | GitHub: [link] | Demo: [link]**
- Built a multi-company construction management platform covering Companies, Projects, Workers, Teams/Team Heads, Attendance, Stock, Bank Details, Daily Updates, Replies.
- Implemented role-based access control (Employee/Manager/Admin/Owner) with permission checks and admin workflows.
- Added company context switching to filter and protect data across modules (company-scoped records + safer create/update rules).

- Delivered QR-based attendance punching: QR generator screen + public punch page; supports Punch In/Out, stores timestamps and location in DB.
- Created Expo-mobile-ready Rails JSON APIs with Bearer token authentication (token creation/revoke, expiry) and company scoping via X-Company-Id.
- **Blog Post Web Application:** Users can create, schedule, and manage blog posts with customizable publishing options and reminders for regular content updates GitHub link!
- gaming website, Touring website, Analog clock ,Calculator, snake game using HTML, JavaScript, and CSS to

SOFT SKILLS

- Teamwork and Collaboration, Problem-Solving, Critical Thinking
